

This is some zettel in the vault. It links to [something](#)

Some obsidian callout

i The scientific method >

1. Observation & description of phenomena
2. Hypothesis to explain phenomena
3. Use hypothesis to predict
4. Use experiments to test predictions
5. Willingness to abandon hypothesis in time of contradiction

Now let's add some images in hewe

Weeeee

Here's some note embed of

something

This links to the [zettel](#) page? or does it?

Whoops apparently embed doesn't work

Some code block

```
print('hello world')  
print(`iernstd`)
```

sss

iearntarste aerst

Okay so it doesn't handle excalidraw

what about pdf
